

GOLU SHARMA

Cloud & DevOps Engineer

+91 6386804436 • golusharma5743@gmail.com • linkedin.com/in/golu-sharma • Hyderabad, India

PROFESSIONAL SUMMARY

AWS-focused Cloud & DevOps professional with 20+ months at Wipro in SLA-driven technical operations. Hands-on experience architecting and administering AWS core services (EC2, IAM, VPC, RDS, S3, EBS, EFS, SNS, Lambda) paired with Linux system administration and Bash automation. Built serverless and CI/CD portfolio projects demonstrating end-to-end cloud and pipeline skills. Proven track record of exceeding KPIs, leading incident triage for production-impacting issues, and driving process improvements. Actively pursuing cloud engineering and DevOps roles.

TECHNICAL SKILLS

Cloud (AWS): EC2, S3, IAM, VPC, RDS, EBS, EFS, SNS, Lambda — instance lifecycle, security groups, IAM roles & policies, subnetting, CIDR

DevOps & CI/CD: Git, GitHub, Jenkins, Maven, Ansible, Docker, CI/CD pipelines, Declarative Jenkinsfile, SCM polling

Operating Systems: Linux/Ubuntu — user management, permissions, process monitoring, APT/YUM; Windows (proficient)

Scripting & Automation: Bash — system monitoring, multi-user provisioning, log management; Windows Batch scripting

Networking: TCP/IP, SSH, netstat, VPC subnetting, security group configuration

Support Tooling: Case management, SLA tracking, KPI monitoring, escalation workflows, incident documentation

CLOUD & DEVOPS PROJECTS

Cloud Resume with Serverless Visitor Counter | AWS

- Architected and deployed a fully serverless application using S3 (static hosting), Lambda (Python), API Gateway, and DynamoDB on AWS.
- Configured IAM policies with least-privilege scoping and cross-origin security (CORS) to enable secure API communication between frontend and backend.
- Debugged Lambda execution environment, permission chains, and browser caching issues — translating infrastructure logs into actionable fixes.
- Implemented event-driven architecture: HTTP request → API Gateway trigger → Lambda function → DynamoDB atomic write/read.

CI/CD Pipeline Automation | Jenkins, GitHub, Apache Tomcat, Windows

- Built a local CI/CD pipeline on Windows that automates web content deployment from GitHub to Apache Tomcat, eliminating manual file transfers.
- Configured Jenkins SCM polling to detect repository changes every minute and trigger a Declarative Pipeline automatically.
- Authored Windows Batch scripts to handle artifact deployment across pipeline stages.
- Debugged Windows service account permission conflicts between the Jenkins service user and Tomcat — resolving cross-service file access issues and deepening understanding of Windows service account management.

AWS Cloud Infrastructure

- Provisioned EC2 instances end-to-end — key pairs, security groups, Elastic IPs, AMIs — and performed full instance lifecycle operations.

- Designed multi-tier VPC environments with public/private subnets, custom CIDR ranges, route tables, and Internet Gateways; enforced least-privilege access via IAM roles and policies.
- Configured RDS instances with automated backups, EBS volumes with snapshot policies, EFS file systems for shared storage, and S3 buckets with lifecycle rules.
- Authored and deployed Lambda functions (Python) for event-driven automation, integrating with SNS topics for alerting workflows.

Linux System Administration & Bash Automation Lab

- Engineered a Bash multi-user provisioning script automating account creation, group assignment, sudo configuration, and secure home directory setup.
- Built a real-time system health monitoring script capturing CPU, memory, and disk utilization (top, free, df) with timestamped log persistence.
- Administered Ubuntu environments on Oracle VirtualBox — package management, permission hardening (chmod/chown), process monitoring, and SSH key management.

WORK EXPERIENCE

Quality Analyst | Wipro, Hyderabad, India

Jul 2025 – Jan 2026

- Audited and managed support cases across multiple teams, enforcing SLA compliance and reducing resolution gaps through structured quality reviews.
- Served as first responder for P1/P2 production-impacting incidents — triaged, prioritized, and routed critical cases to resolver teams within defined escalation windows.
- Authored detailed post-resolution documentation capturing root cause, troubleshooting steps, and corrective actions, forming a reusable knowledge base.
- Identified recurring failure patterns and submitted analysis reports to engineering teams, directly contributing to tooling and workflow improvements.
- Consistently exceeded daily KPIs in a high-velocity queue environment; maintained top-tier case-accuracy scores 98% across audit cycles.

Associate | Wipro, Hyderabad, India

Mar 2024 – Jun 2025

- Reviewed, triaged, and routed high volumes of inbound support requests against operational policies and change-control frameworks with zero SLA breaches.
- Maintained precise audit trails for every case, ensuring full traceability of escalation actions and outcomes for compliance reviews.
- Demonstrated sound judgment in ambiguous or policy-edge scenarios, reducing unnecessary escalations by applying framework guidelines accurately.

EDUCATION

BCA — Bachelor of Computer Applications

2020 – 2023

FSB Degree College | CGPA: 8.5 / 10

Intermediate (12th Grade)

2018 – 2020

Pawanagar Mahaveer Inter College

CERTIFICATIONS

AWS Certified — actively pursuing (Cloud Practitioner / Solutions Architect track)
