

GOLU SHARMA

AWS Cloud Support Engineer

+91 6386804436 • golusharma5743@gmail.com • linkedin.com/in/golu-sharma • Hyderabad, India

PROFESSIONAL SUMMARY

AWS-certified-track Cloud & Support professional with 20+ months at Wipro in SLA-driven technical operations. Hands-on experience architecting and administering AWS core services (EC2, IAM, VPC, RDS, S3, EBS, EFS, SNS, Lambda) paired with Linux system administration and Bash automation skills. Proven track record of exceeding daily KPIs, leading incident triage for production-impacting issues, and driving process improvements that reduced recurring escalations. Eager to leverage cloud expertise and operational discipline in a cloud support or infrastructure role.

TECHNICAL SKILLS

Cloud (AWS): EC2, S3, IAM, VPC, RDS, EBS, EFS, SNS, Lambda — instance lifecycle, security groups, IAM roles & policies, subnetting, CIDR

DevOps & CI/CD: Git, GitHub, Maven, Jenkins, Ansible, Docker, CI/CD pipeline

Operating Systems: Linux/Ubuntu — user management, permissions, process monitoring, APT/YUM; Windows (proficient)

Networking: TCP/IP, SSH, netstat, ping, VPC subnetting, security group configuration

Scripting & Automation: Bash — system monitoring, multi-user provisioning, log management, automated backups

Support Tooling: Case management, SLA tracking, KPI monitoring, escalation workflows, incident documentation, quality auditing

WORK EXPERIENCE

Quality Analyst | Wipro, Hyderabad, India

Jul 2025 – Jan 2026

- Audited and managed support cases across multiple teams, enforcing SLA compliance and reducing resolution gaps through structured quality reviews.
- Served as first responder for P1/P2 production-impacting incidents — triaged, prioritized, and routed critical cases to the correct resolver team within defined escalation windows.
- Authored detailed post-resolution documentation capturing root cause, troubleshooting steps, and corrective actions, forming a reusable knowledge base for the team.
- Identified recurring failure patterns and submitted analysis reports to engineering and process teams, directly contributing to tooling and workflow improvements.
- Consistently exceeded daily KPIs in a high-velocity queue environment; maintained top-tier case-accuracy scores across audit cycles.
- Delivered clear written status updates and resolution briefs to internal stakeholders, improving cross-team visibility on high-priority issues.

Content Moderator | Wipro, Hyderabad, India

Mar 2024 – Jun 2025

- Reviewed, triaged, and routed high volumes of inbound support requests against operational policies and change-control frameworks with zero SLA breaches.
- Maintained a precise audit trail for every case, ensuring full traceability of escalation actions and outcomes for compliance reviews.
- Managed simultaneous workstreams under pressure, consistently prioritizing effectively to meet strict SLA targets in a fast-paced environment.
- Demonstrated sound judgment in ambiguous or policy-edge scenarios, reducing unnecessary escalations by applying framework guidelines accurately.

CLOUD & TECHNICAL PROJECTS

AWS Cloud Infrastructure Lab

- Provisioned EC2 instances end-to-end — key pairs, security groups, Elastic IPs, AMIs — and performed full instance lifecycle operations including start, stop, reboot, and terminate.
- Designed multi-tier VPC environments with public/private subnets, custom CIDR ranges, route tables, and Internet Gateways; enforced least-privilege access via IAM roles and policies.
- Configured RDS database instances with automated backups, EBS volumes with snapshot policies, EFS file systems for shared storage, and S3 buckets with lifecycle rules and bucket policies.
- Authored and deployed Lambda functions (Python) for event-driven automation, integrating with SNS topics for alerting workflows.

Linux System Administration & Bash Automation Lab

- Engineered a Bash multi-user provisioning script automating account creation, group assignment (usermod, gpasswd), sudo configuration, and secure home directory setup — reducing manual provisioning time significantly.
- Built a real-time system health monitoring script capturing CPU, memory, and disk utilization (using top, free, df) with timestamped log persistence via output redirection.
- Administered Ubuntu environments on Oracle VirtualBox — package management (APT/YUM), permission hardening (chmod/chown), process monitoring (ps, kill, htop), and SSH key management.

EDUCATION

BCA — Bachelor of Computer Applications

FSB Degree College | CGPA: 8.5 / 10

2020 – 2023

Intermediate (12th Grade)

Pawanagar Mahaveer Inter College

2018 – 2020
